Subject: docket # 98P-1194

I am writing to urge removal of rBGH from the marketplace. Due to recent information from both Canadian and University of Illinois studies, it is imperative that the FDA take action to protect the American public from the health risks posed by the existence of this product in the US milk supply. Until that time it is urgent that all consumers of US dairy products be urged to boycott all US dairy products with the exception of those that are organically produced. I will do all within my power to see that this is carried out and will do all within my power to support any action against the FDA until rBGH is removed from our food supply. The health of our families is at stake and the FDA must take the necessary action to protect those interests.

Sincerely,

Rick Martinez
